## **DETAILED ACTION**

1. Claims 1-20 have been examined.

### ***Allowable Subject Matter***

2. Claims 1-20 allowed.
3. The following is an examiner's statement of reasons for allowance: Jennings reference discloses a communication system supporting simultaneous voice and multimedia communication in which user is authenticated prior to access messages while Wilson reference discloses telecommunication system with personal caller identification capability utilizing voiceprint. The prior art of record individually or in combination fails to disclose detecting a voice command from the first caller during the telephone call; requesting a certificate corresponding to the second user from an authentication server in response to the voice command; requesting authentication of the certificate corresponding to the second user from a control program associated with the second user; and verifying authentication by comparing the authentication certificate corresponding to the second user and received from the control program associated with the second user with the certificate received from the authentication server in light of other features disclosed in independent claims 1 and 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Heiden U.S. Pat. No. 6789193 discloses a method for authenticating a network user by generating a certificate upon request by a caller based on caller-ID.

Svedberg U.S. Pat. No. 6341128 discloses providing call center with voice gateways.

Sawyer et al U.S. Pat. No. 6324271 discloses system for authentication of caller identification.
